

# Edintore II

## Wind Farm Proposal

EDP Renewables welcomes you to this public exhibition on our proposed Edintore II Wind Farm

Thank you for taking time to come along to today's exhibition on the proposed Edintore II Wind Farm development.

The purpose of the exhibition is to:

- Explain how this site has been selected;
- Outline the key aspects of the proposed wind farm which have been refined after additional data gathering and feedback from the local community;
- Describe the technical and environmental surveys which have been undertaken;
- Enable you to view how the proposed wind turbines might look like from various nearby locations.

Please take as much time as you need to review the information presented and the visual representations of the wind farm. Key members of the project team are on hand to provide you with answers to any questions or to discuss any comments on our proposals.

We would very much value your continued feedback as we seek to finalise our plans and would be grateful if you could take a few minutes to share your views via the paper feedback forms provided or at our website:
